

PROJECT 3. CHINOOK MUSIC DATABASE

JOYCE WENDO

Total Amount Spent by Customers Based on Country

We can see that Canada is leading with 303.96, followed by France and the Brazil with 195.1 and 190.1 respectively. Germany is at position four with 156.48. The rest of the other countries have spent a total amount below 50 dollars.

It is clear that customers from Canada buy the tracks more than those from all other countries.

The Total Amount Spent in USD for Each Artist.

Most customers spent on Iron Maiden's music followed by U2's Music

Apart from the two artists above, none of the rest sold a total amount above 100 dollars..

The least amount spent was on Battlestar Galactica.

It is clear that Iron Maiden's Music was loved and that is why most customers spent on the artist.

Total Amount Spent by customers Only On Artist Name, Iron Maiden

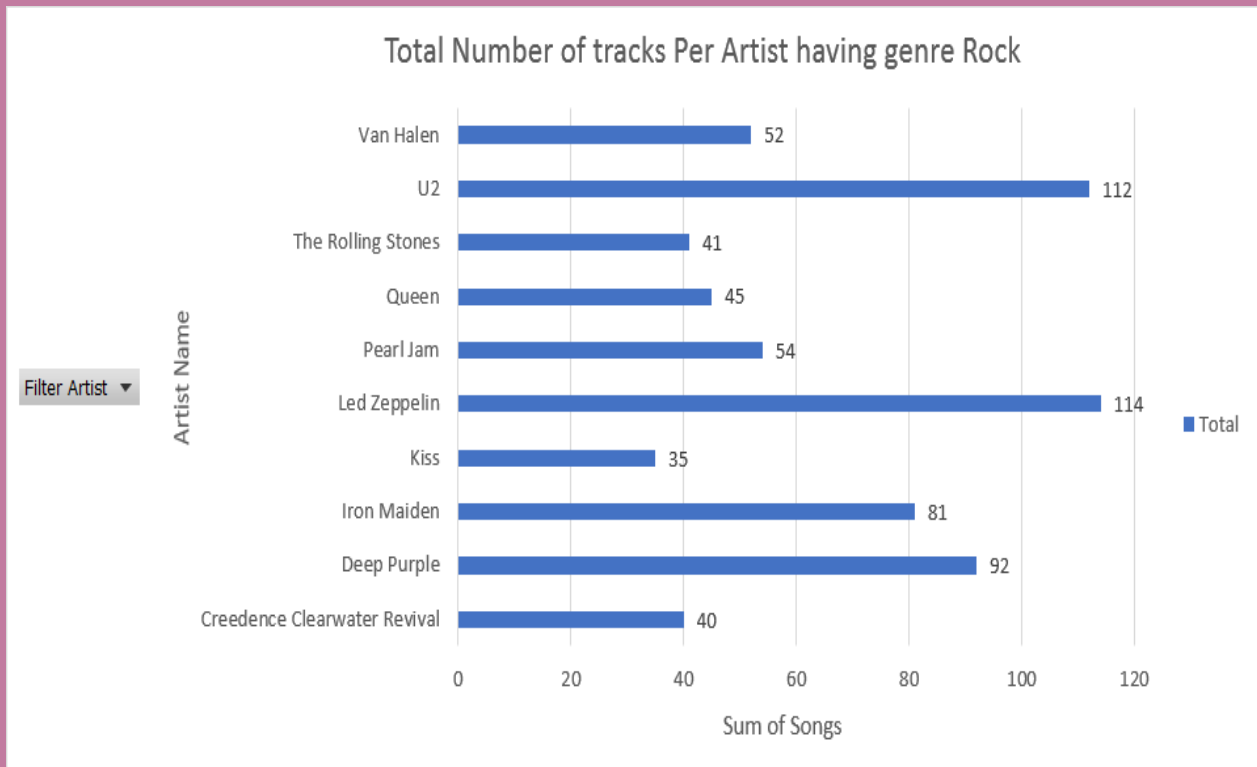

Mark must have been a big fan of Iron Maiden because he spent the most on them.

Tim, Manoj and Camille spent the same total amount on Iron Maiden.

Frank and Hannah spent the same total amount too.

Maybe the customers who spent the same total amount might have bought the same number of tracks from Iron Maiden.

Total Number of Tracks Per Artist having Genre Rock

We can see that Led Zeppelin is leading with 114 tracks in the Genre Rock.

After Led Zeppelin, U2 follows with 112 tracks. There is no other rock artist who has tracks above 100.

It seems Led Zeppelin was recording more music than the other bands like Iron Maiden, who sold more(as seen in the previous slide for Visualization 2).
